

TULSION[®] MB-115 BG

Mixed Bed Ion Exchange Resin for Production of Ultra Pure Water

TULSION® MB-115 BG is a mixture of strongly acidic black cation exchange resin **TULSION® T-42** in Hydrogen form and strongly basic type I anion exchanger resin **TULSION® A-23** in Hydroxide form in 1:1.5 volume ratio quantities.

TULSION® MB-115 BG is designed for use in the final polishing for production of ultra pure water.

TULSION® MB-115 BG is the ideal choice for electronic industries, which manufacture semi conductors and television tubes, etc where ultra pure water is required. This resin combines high capacity with excellent physical properties.
